github.com/fgyimah

Full-stack software engineer with 7+ years of experience building scalable web applications. Strong in React, TypeScript, Node.js, Golang, and SQL/NoSQL, with experience using Docker and AWS. Focused on performance, clean architecture, and delivering real business impact.

WORK EXPERIENCE

Javascript engineer
Prezly

04/2022 - Present   *Belgium*
https://prezly.com (Remote role)

Achievements/Tasks

- Upgraded company-wide newsroom themes and prezly website to React 18 & Next.js 14, modernizing the frontend stack and enabling faster builds and smoother rendering.

- Migrated caching layer to Redis v5 and integrated a Next.js-compatible caching library, significantly improving response times and local development performance.

- Implemented real-time error tracking and logging with Sentry, reducing undetected frontend crashes and improving debugging efficiency.

Fullstack Javascript developer
Oozou

05/2021 - 04/2022   *Thailand*
https://oozou.com (Remote role)

Achievements/Tasks

- Built and optimized features across a large-scale React + Node.js e-commerce platform, ensuring reliability under heavy traffic conditions.

- Enhanced backend performance with PostgreSQL + Redis caching strategies, reducing query times and improving checkout speed.

- Participated in code reviews, architecture discussions, and interviews, while promoting best practices in TypeScript, testing, and CI/CD pipelines.

Senior React developer
Agiliti Techpartners

12/2020 - 05/2021   *India*
Remote role

Achievements/Tasks

- Led the development and deployment of a client-facing application tailored for the U.S. tax system, focusing on functionality and alignment with user experience requirements.

- Played a critical role in redeveloping a hospital management application using React and TypeScript, resulting in improved performance and maintainability.

- Contributed to the talent acquisition process by participating in technical interviews, aiding in the identification of candidates suited to organizational needs.
